PROFILE SUMMARY

AI/ML Engineer with a B.Tech in Computer Science (AI & ML) from Karnavati University. Skilled in deep learning, medical image analysis, GANs, and explainable AI for healthcare applications. Experienced in building and deploying real-world ML models using Python and data analysis techniques. IEEE Reviewer and author of multiple research publications, including a Scopus-indexed book chapter, journal, and conference papers. Passionate about applying AI to solve real-world healthcare and societal challenges. A quick learner with excellent problem-solving and communication skills, committed to developing innovative AI-driven solutions.

TECHNICAL SKILLS

Programming Languages: Python, C

Machine Learning & Deep Learning: TensorFlow, Keras, PyTorch, Scikit-learn, CNN, DCNN

Explainable AI (XAI): Grad-CAM, SHAP, LIME

Natural Language Processing (NLP): NLTK, Transformers

Data Analysis & Processing: Pandas, NumPy, SciPy

Data Visualization: Power BI, Tableau, Matplotlib, Seaborn, Plotly

Web Development: HTML, CSS, JavaScript, Flask, Streamlit

Database Management: MySQL, MongoDB

Computer Vision: OpenCV, YOLO

Generative AI & Synthetic Data: GAN's (DCGAN, CGAN, CycleGAN)

PROJECTS

ONLINE FOOD ORDERING SYSTEM

NOV 2022

Tools & Technology:- DBMS, MYSQL

The Purpose of this project is to develop a system to solve the issue, increase of take away than visitors, speed major request of food management, limited promotion, and quality control of food management.

AIR QUALITY INDEX PREDICTION

Nov 2022 - Dec 2024

Tools & Technology:- AIML, IoT

In this AQI concept ML and IoT Sensors or devices used from this it extracts valuable insights from the data. It collects data, process it and then predict the Air Quality Index.

SOCIAL DISTANCING MONITORING USING YOLOv3

Nov 2023

Tools & Technology:- Deep Learning, OpenCV

This project aims to provide an overhead perspective-based deep learning framework for social distance tracking. The framework recognises humans in a video sequence using the YOLOV3 object recognition paradigms. Additionally, there is a breach of social distance in this. Alerts show who is closer than the established safe distance.

A CUTTING-EDGE IOT APPROACH TO HOME SAFETY WITH GAS SENSING TECHNOLOGY

MAR 2024

Tools & Technology:- IoT, OpenCV

We utilise Raspberry Pi, OpenCV, and IoT devices in this project. The idea behind this project is that fire prevention is vital and must be prioritised. Fire is a terrible force that spreads rapidly and can cause enormous destruction to people, property, and even their lives.

VIRTUAL PERSONAL AI ASSISTANT

MAR 2024

Tools & Technology:- NLP, AI

Develop a Python virtual personal AI assistant that is capable of handling CMD, Google, sending messages, sending emails, getting news and reports, updating weather, and responding to user inquiries on a variety of subjects. The goal is to develop a clever and adaptable assistant that can process natural language input, carry out activities quickly, and eventually employ machine learning to adjust to the preferences of the users.

REAL-TIME RESTAURANT WEBSITE - DESI VIBES

APRIL 2024

Tools & Technology:- WEB DEVELOPMENT (FRONTEND:- Html, CSS, JS) (BACKEND:- MongoDB, Nodejs)

This is a real-time restaurant website, which means it is actual or my own restaurant's website. This project is a web development project using HTML, CSS, JS, and MySQL as a database. The purpose of this project is to book tables online, take events orders for functions purposes online, and contact us through a through a form for enquiries about restaurants or other details through the website. This is my own father's restaurant website.

PLANT LEAF DISEASE DETECTION

MAR 2024

Tools & Technology:- Machine Learning , Python

This project is a full stack development project. In this plant leaf disease detection project, we use the CNN to train and test the data and also made an app to detect plant leaf disease detection, which detects whether the leaf has disease or not. The app is made by using the streamlit web application in Python.

SMART MINDALERT: THE BRAIN STROKE CT IMAGE CLASSIFICATION PREDICTION USING DEEP LEARNING AND EXPLAINABLE AI (XAI)

MAR 2025

Tools & Technology:- Deep Learning, Explainable AI

This is an interactive healthcare web application for real-time brain stroke prediction using brain CT scan images. The system integrates deep learning models such as CNN, Xception, InceptionV3, MobileNetV2, and ResNet, achieving a highest accuracy of 97.21%. It includes Explainable AI (Grad-CAM, SHAP, LIME) for model transparency, along with features like emergency alert via email, AI-powered chatbot, treatment guidance, and video consultation to assist in early diagnosis and decision-making.

RESEARCH PUBLICATIONS

- “Network Security and Data Privacy in 6G Communication: Japan’s 2030 Vision for 6G – A Case Study.” In Taylor & Francis (Scopus-Indexed), 1st Edition, 2025.- First Author
- “BNS Mitra: RAG-Optimized LLM-Based AI-Powered Legal Virtual Assistant.” In ICCSAI 2025 (International Conference), 2025.
- “Review on Air Quality Index and Air Pollutant Concentration Prediction based on IoT and AIML Algorithms.” Indoor Air (Q1 Journal), 2026 — Accepted

ACADEMIC SERVICE

Reviewer, IEEE Contemporary Computing Innovations Conference (CCIC) 2026

INTERNSHIP EXPERIENCE

- AI/ML Project Intern

Attrix Technologies

Location - Agra, Internship Type - Remote (Work From Home) Dec 13, 2024 – Mar 20, 2025

EXTRA CUURRICULAR ACTIVITY

- SMART INDIA HACKATHON (SECURE 4th POSITION FROM TOP 10 TEAMS) MAR 2022
- CODEUNNATI INNOVATION MARATHON (SEMI-FINALIST TEAM) GTU MAR 2024

COURSES

- Supervised Machine Learning Course - COURSERA
- HTML, CSS, and JavaScript for Web Developers - COURSERA
- Edunet SAP Foundation Advance Course - CodeUnnati Edunet Foundation
- Foundation of R Software - NPTEL
- Soft Skills Training Program - NPTEL

CERTIFICATIONS

- Completion of R training - Spoken Tutorial Project IIT Bombay
 - Introduction to Deep Learning and AI Accelerations - Webinar - CloudXLab
 - Java Programming - Great Learning
 - Python Fundamentals for Beginners- Great Learning
 - Introduction to R - Great Learning
-

POSITION HANDLE / LEADERSHIP

Secretary Position - USCI Events and Media Committee (Karnavati University)

2 YEARS

EDUCATION

- Unitedworld Institute of Technology (Karnavati University) 2021- 2025
B.Tech CSE with Specialization in AIML - 8.05 CGPA
 - Higher Secondary School in Science, Gujarat Secondary Education Board, Ahmedabad, Gujarat 2021
 - Secondary School , Gujarat Secondary Education Board, Ahmedabad, Gujarat 2019
-

ONGOING WORKING PROJECTS

- Medical Brain Tumor MRI Image Generation Using Different Variants of GANs in Collaboration with Researcher from Umeå University, Sweden
- Explainable AI and Deep Learning Framework for Multi-Class Plant Disease Detection Across 38 Crop Categories
- Agentic AI Based SLM for Legal Support
- Prompt Injection using Bert's Variants
